برومت Founder Headshot

ستايل مؤسس / LinkedIn / Personal Brand مع مظهر طبيعي واحترافي.

البرومت الجاهز للنسخ

COPY PROMPT

Transform the uploaded photo into a professional, hyper-realistic headshot. Keep the person's face, identity, facial structure, natural features, age, expression, and overall appearance accurate to the uploaded image. Style the final image like a high-end personal brand / LinkedIn / founder headshot: tight portrait framing from upper chest to just above the head, subject centered and facing the camera, natural relaxed expression with a slight confident smile, clean polished skin while keeping realistic texture, pores, and natural imperfections, sharp focus on the eyes, soft flattering lighting from the front-left, subtle catchlights, realistic depth of field, smooth blurred background with warm indoor tones, 85mm portrait lens look at wide aperture, natural color grading with warm highlights and soft contrast, clean modern premium editorial feel. Clothing: simple, modern, professional dark minimal top such as a black sweater. Background: softly blurred modern office, studio, or upscale interior in neutral dark and warm tones, no logos or text. Preserve the person's real identity and facial proportions; do not make it look AI-generated, no plastic skin, no changes to ethnicity, gender, age, facial structure, or eye shape; output should look like a real professional headshot.

The subject is framed from the chest up, with ample headroom and negative space above their head, ensuring the top of their head is not cropped. The person looks directly at the camera with a confident, authoritative expression, and the subject's body is positioned at a slight 3/4 angle to the camera. Captured on an 85mm f/1.8 lens with a shallow depth of field, exquisite focus on the eyes, and beautiful, soft bokeh. Create a high-end black and white portrait using my selfie. The face must remain exactly as in on my original selfie - no editing, no retouching, no smoothing. I'm wearing the business suits. Preserve every facial detail and texture for a raw, authentic look. The lighting should be dramatic and studio-quality, using strong contrast and shadows to sculpt the features. Use a clean, blurred studio-style background with soft gradients or subtle texture to enhance focus on the subject. Frame the portrait vertically (9:16 format), centered composition, with ultra-realistic skin texture and depth. No digital makeup or alterations. The final result should look timeless, editorial, and emotionally powerful - suitable for a gallery or fashion magazine.
